1 [Quality is in the eye of the beholder: meeting users' requirements for Internet quality of service](#)

Anna Bouch, Allan Kuchinsky, Nina Bhatti

 April 2000 **Proceedings of the SIGCHI conference on Human factors in computing systems**

 Full text available: [pdf \(863.24 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Growing usage and diversity of applications on the Internet makes Quality of Service (QoS) increasingly critical [15]. To date, the majority of research on QoS is systems oriented, focusing on traffic analysis, scheduling, and routing. Relatively minor attention has been paid to user-level QoS issues. It is not yet known how objective system quality relates to users' subjective perceptions of quality. This paper presents the results of quantitative experiments that establish a mapping between ...

Keywords: Internet, quality of service, user perception
